**JUNE 2021**

**3 Honduras: Copán and Pico Bonito with Bill Gette**
A visit to the Central American country of Honduras offers wildlife opportunities not only to explore one of the most important archaeological sites in the region, but also to experience an incredible variety of wildlife. During a 9-day trip, Bill Gette led a group through the world-famous Maya archaeological site of Copán, explored the tropical Island Reserve at Lago de Honduras National Park, took a narrow-gauge railway into Goodyer Island and visited the dry forest of the Rio Aguan Valley in search of an unexplored bird. Bill will share photographs of the amazing temples and intricately carved monuments at Copán, exquisite flowers, brilliantly colored birds, and the northwest monkeys he and his group encountered.

**10 The Memory Thief and the Secrets Behind How We Remember**
How could you keep your memory forever, or what would it mean? The documentary JED BARASH uses the haunting brain scan of a young patient with devastating amnesia marks the beginning of a quest to answer those questions. First selected in a cluster of diagnoses thought to be rare, the patient’s case has opened the door to advances in medical science. Award-winning science journalist and former producer of the PBS series NOVA, documents the story in his first book, the Memory Thief: coming out June 1.

**23 Growing Asian Vegetables**
Last summer, three women, Sirinya Matchacheep, Rose Xu, and Chetana Keltcher met through the Gardening in Lexington Facebook group and began exchanging their knowledge and passion for gardening, plants, and crops. Now, they will share their experiences with growing vegetables and how to make their favorite recipes with what they grow. Join them at this free discussion group, moderated by Robert Berend, J.D., Ph.D., who has been running these all over the world for more than twenty years. You can find them on Facebook at DeepThoughtsLex. All are welcome.
